## Experience

---

### **UI Lead**, March 2016 – Present

KBS, Spies & Assassins, New York, NY

- Leader for the UI engineering team to ensure the health and growth of our engineers
- Management of the UI team of developers: resource allocation, scoping and technical oversight
- Provide engineers with mentorship to develop both their technical and professional skills
- Assist in development as a lead engineer on projects with teams of multiple engineers
- Define and uphold standards for approach, internal tools, documentation, and workflow
- Active in the planning of new projects to meet business requirements and scope work
- Meet with and give presentations to clients, partner agencies and third-party vendors
- Active involvement in the interview and hiring process for the engineering and production staff

**Clients:** AMEX, Banana Republic, BMW, Harman, Hershey, HomeGoods, Moët & Chandon, Jay-Z, JBL, Puma, Stanley Black & Decker, Vanguard and Windstream

### **Senior UI Developer**, March 2014 – March 2016

KBS, Spies & Assassins, New York, NY

- Development of single page apps to full ecommerce sites while integrating custom/third-party APIs
- Collaborate closely with UX, Creative, Product and Platform departments
- Teach multiple classes to non-technical departments about web development and how it pertains to them
- Build component based libraries for multiple client adhering to the atomic design pattern to be integrated with CMS platforms such as Django and AEM

### **Front End Developer**, July 2012 – March 2014

KBS, Spies & Assassins, New York, NY

- Build responsive, mobile-first sites and web applications for maintainability, scalability, and SEO performance
- Deliver software utilizing the latest standards in JS patterns, frameworks and front end task management
- Enhance user interfaces with CSS Animations, Controlled Video and JavaScript
- Integration of UI into various CMS solutions (DjangoCMS, WordPress, Etc.)
- Developed and deployed products with Agile and Waterfall approaches

### **Web Designer/Front End Developer**, May 2009 – June 2012

Ramapo College of New Jersey, Mahwah, NJ

- Design and development of new, cross-browser compatible websites for the College's public and internal web pages
- Translated Photoshop wireframes and sketches into functional, dynamic web pages
- Used JavaScript to convert and customize interactive elements from Flash.
- Optimized and improved newly developed websites to conform to SEO best practices
- Migrated and integrated new and existing static websites into a CMS
